

Water Premium Recovery

Finsbury Food Group

Our Team were commissioned by Finsbury Food Group to explore a range of their sites across the UK. There was a clear opportunity to implement a selection of the water services cost reduction opportunities we have to offer with the aim to achieve an effective cost reduction programme across the company. This programme enabled by our team will see the company save thousands of pounds year on year, but also enable significant retrospective claims to be made for monies owed from historic billing errors made by the water company.

After a successful Water Audit with fantastic conversion rates resulting in over a 30% success to claim ratio we have been able to provide Finsbury Food Group with savings of thousands of pounds on one site alone in regard to a recurring mischarge relating to the current and previous Rateable Value (RV) charges. These miscalculations by water companies are by no means uncommon and lead to companies being wrongly penalised and lead to long term and unfair increases in their billing.

After we were able to remove the increased charge and reclaim monies for Finsbury Food Group, we then completed a in depth water report to provide Finsbury Food Group with a more water efficient future with any saving being 100% retained by Finsbury Food Group.

Finsbury Food Group

We are currently working with Finsbury Food helping them secure refunds and savings across their various divisions.

Areas of investigations included :

- Rateable Value charge adjustment (R.V)
- Trade effluent strengths and allowances
- Non connection allowance
