

Water Premium Recovery

Primark

PRIMARK®

Over the last fifteen years we have established an unrivalled relationship with Primark, which has over this time resulted in over 1.2 million pounds in combined water savings across all sites we have worked with to date in the UK.

Using our established knowledge and expertise in the water services sector, we have been successful in reclaiming monies in over 50% of Primark sites across the UK.

In 2018/19 we were responsible for a water switching service for the whole company resulting in saving of thousands of pounds and significant service improvements. These savings became possible following deregulation of the water retail market in 2017.

We have worked in partnership with Primark for fifteen years and this has delivered not only one-off savings but has also ensured that water services will be provided efficiently and billed accurately at all sites in the future.

Primark

We have worked with Primark Stores for several years securing refunds and savings of over £1.2 million pounds.

Areas of investigations included :

- Duplicate charging and incorrectly applied tariffs
- Meter sizes and charge reduction
- Leak detection and calculation of refunds
- Surface water and highways drainage charge reduction.
