

Water Premium Recovery

The Priory Group

PRIORY

The Priory Group

We achieved significant savings and rebates after assessing the 275 Priory facilities across the UK.

Our Team were commissioned to undertake an extensive Water Audit with the aim to rectify any irregularities within water billing for over 275 of The Priory's estates nation wide.

We were quick to conclude the water tariff charges which The Priory Group had been paying (often for many years) were incorrect. In some cases these charges ranged from unknown leaks and old equipment with no measuring facilities. Others arose from non consumptive charging mechanisms being incorrect such as surface water and highways drainage charges. Collectively when these incorrect charges were analysed and collated, it resulted in hundreds of thousands of pounds being reclaimed.

All in all this proved to be a hugely worthwhile exercise in which The Priory Group remained fully cash positive throughout the process and are now reaping the benefits.

Areas of investigations included :

- Meter size and charge reduction
- Surface water & highways drainage charge reduction
- Leak detection and calculation of refunds due
